AN HOTEL MAN'S STORY.

THE PROPRIETOR OF THE GRAND UNION, TORONTO, RELATES AN INTERESTING EXPERIENCE.

Inferred intensely from Rheumatism, Dr. Williams' Pink Pills for Pale People.

From the Toronto Globe.

One of the most popular floors at the recent meeting of the Masonic Grand Lodge of Canada was Rev. L. A. Bates, of Brockville, Grand Chaplain for 1893.

While on his way to Grand Lodge, Rev. Mr. Bates spoke of the late Mr. J. W. Dunnet, and among other points of interest, the World office.

He said that he had been to the home of that world-famous medium, and incidentally the conversation with Mr. Bates turned in that direction.

When he told the World that he had that day not an old friend, whose experience was a most remarkable one. The friend alluded to was Mr. John Soby, for many years proprietor of the Indian Hotel in Toronto, and now a resident of the United States.

Mr. Bates turned to that direction, when he told the World that he had that day not an old friend, whose experience was a most remarkable one. The friend alluded to was Mr. John Soby, for many years proprietor of the Indian Hotel in Toronto, and now a resident of the United States.

CITY AND DISTRICT.

There was no police court to-day.
The Albert College opened this afternoon with a large attendance.
The Duff & Dunn Institute will open on Wednesday, 19th inst.

The Separate School Board was to have met last evening, but was not in session.
The Mr. Collier, with no understanding at Kingston, was seen at the office of the Board.

Be sure and attend Grant's cheap cash sale. He will put bargains in Boots and Shoes.

The early symptoms of dyspepsia, heartburn and occasional headaches, should not be neglected. Take Hood's Sarsaparilla.

All persons indebted to the estate of the late J. W. Dunnet must settle their accounts before the 15th of September, 1894.

The police received word yesterday afternoon that some tramps were begging in Coleman ward, but when an officer went over they had decamped.

The Burial, one of the best plays produced here last season, has been secured by Manager Power for his drama. The house should be filled to the doors.

Mr. Alexander makes his last trip to Charlotte Saturday, Sept. 8th, leaving there at 7:30 p.m. Sunday, Sept. 9th, continuing his regular trips from Brighton to Montreal until and after Sept. 10th.

A large force of men are employed on the granite pavement and the work is progressing rapidly. The business men along Bridge St. are proud of the work to be done, but they do not relish the interruption to their business.

Many people, not aware of the dangers of constipation, neglect the proper remedy. The habit becomes chronic, or inflammation of the bowels ensues, or even the danger of Ayer's Pills in the beginning would have prevented this.

The Ochoyus Festival Sunday. Potatoes are becoming general in this neighborhood, and the crop is a poor one, not being the season, especially in the West. In the country, however, the yield is said to be very good, with scarcely any rot.

A. G. Holden, confidential agent of the Ontario Gold Ore Lathery, will be in the Anglo American Hotel for a few days, and will be glad to give information regarding the ore of the lathery, and the liquor and tobacco laws. All interviews strictly confidential. (10416).

James McNeill got out of yesterday afternoon serving a term of days in the County Jail. He was released on bail, and proceeded to celebrate the occasion by going up again. Officer O'Donnell happened along and gathered him up, and he was sent back this morning for thirty days more for want of \$40 to pay his fine.

Ayer's Sarsaparilla is one of the few remedies which are recommended by every school of medicine. It is strong, purifying, and it cures all the diseases of the blood, and it is of such a nature as to be of service to all other blood purifiers. Ayer's Sarsaparilla is the best.

The stock saved from the fire at Balcan & Lockhart in the Stone Store hours in the rear and the wholesale department up stairs, amounting to fifteen thousand dollars, all more or less injured by smoke and water. This is being removed to the stone store at the Anglo American Hotel, and in a few days the great Stock and Shoe sale will commence.

Coughs and colds are "forbidden fruit" to many persons so constituted that the least indiscretion is followed by attacks of cholera, dysentery, griping, &c. They are persons who are not aware that they can induce their bowels to move by the use of a bottle of Dr. J. C. Kellogg's Dysentery Cordial, a medicine that will give immediate relief, and is a sure cure for all summer complaints.

The note at school.—Boys who are away at school should always be ready for sudden attacks of Quins, Diphtheria or Dysentery, for a physician is not always at hand, and an hour's delay in case of this kind often leads to serious results. Therefore parents should supply their sons with a bottle of Dr. J. C. Kellogg's Dysentery Cordial, a medicine that will give immediate relief, and is a sure cure for all summer complaints.

The case withdrawn.—The charge of seduction preferred against Squire Holden, of Rawdon, by Mrs. Sarah Hume on behalf of her son, David Hume, has been withdrawn.

Things comfort and improvement and to personal enjoyment when they are used. The man who lives for himself and enjoys life more, with less expenditure, by more promptly satisfying the world's best products, the needs of physical being, will attest the value to health of the pure liquid laxative principles embodied in the cod-liver oil, Syrup of Figs.

Its excellence is due to its presenting in the form most acceptable and pleasant to the taste, the refreshing and truly beneficial properties of a perfect laxative, effectually cleansing the system, and promoting the general health and vigor, and with the approval of the medical profession, because it acts on the kidneys, liver and bowels without troubling the stomach, and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all druggists in 75c. bottles, but it is manufactured by the California Fig Syrup Co., only, and its name is prominent on every package, also the name, Syrup of Figs, and being well informed, you will not accept any substitute if offered.

Daily Intelligencer.

BELLEVILLE, SATURDAY, SEPT. 8.

THE DOMINION INTERESTS.

The Grit press are never tired of misrepresenting the independence of Canada, and its cause. It is admitted by all that Canada has quite a debt, but what has been done by financing that debt, and what effect has the expenditure had, is a question way on the country. It is a question that should always be considered with the aid of debt and its burthen.

Now, should Confederation, the net debt of Canada has been estimated at \$106,000,000. What has caused the Dominion debt? Upon the Canada \$40,000,000 has been spent, upon the Pacific railway \$62,000,000, upon the International railway \$15,000,000, and debt of the provinces to the amount of \$30,700,000 have been secured—making all an expenditure of \$127,700,000 on account of these services, or about \$12,000,000 more than the whole increase of the public debt since Confederation. Is there anything startling in that state of affairs? Is there anything in these expenditures has public opinion been opposed? Certainly the Liberal party, during their term of office, is not in a position to avail of the credit of the public liabilities. But so far as the credit of the Dominion is concerned, the Grit Opposition have very poor material upon which to find fault, and it may therefore be worth while stating the facts in this connection.

In 1885 the net debt of the Dominion was \$254,531,000, and at the close of the fiscal year 1893 it had risen to \$241,681,000, an increase of seven millions in five years, or an average of less than a million and a half annually. In detail the figures are: 1885, population, 4,688,147; debt, \$254,531,000; debt per head, \$53.65; interest, \$4,242,313; 1893, population, 4,991,528; debt, \$241,681,000; debt per head, \$48.71; interest, \$3,696,988. There is certainly nothing in the alarming nature in these figures, on the contrary, they are of the most satisfactory character, showing as they do that the per capita liability is decreasing, and that the actual interest charge does not augment. The real charge for interest, moreover, is less than the figure given above, because less than the interest on the gross debt, the Dominion possesses substantial assets of a revenue producing character. In 1888 the interest received from investments, was \$302,029, and in 1893 it was \$319,449, and deducting this amount from the payment of interest on the gross debt, the actual cost of carrying the Dominion debt is found to have been only \$9,660,000 last year, as compared with \$9,000,000 five years before. That the debt of Canada is not regarded by capitalists as excessive, nor the management of public affairs as imprudent, is attested by the average rate of interest on the net debt in 1888 was 3.12 per cent, is now only 2.68 per cent, as compared with a rate of 3.68 per cent. when the Liberal party retired from office. In view of which, we submit that the Grit press is needlessly alarmed about the credit of the public debt, which instead of becoming more burdensome is actually growing lighter in its bearing on the resources of the Government.

THE GROWTH OF METHODISM.

It is well remarked by the Montreal Star, in commenting upon the annual statistics published at the General Conference, that the Methodists may be proud of the ground gained during the last quadrennium. The church now shows a total membership of over 200,000, an increase for the last four years of 20,000. The census for 1891 gives the Methodist denomination 187,000 persons, the largest number credited to any Protestant church in the Dominion. The difference between the figures is probably due, in part, to the children of Methodist families who have not yet been put upon the church rolls, and to the large body of "adherents" that is found in all churches. Increases, too, are shown all along the line. More children have been baptized during the quadrennium than the last, and more adults too. The number of marriages has increased, and the increase is conspicuously larger than that in the number of burials. Church members have increased in a healthy manner, both in number and value, and collections have shown a most encouraging advance of \$650,000. The church is now offered by nearly 2,000 ministers of the Gospel, who are active in every part of the Dominion.

FOR THE STRUGGLE

THE COURSE OF STUDY OFFERED BY THE BELLEVILLE BUSINESS COLLEGE GIVES A YOUNG PERSON A THOROUGH AND PRACTICAL KNOWLEDGE OF BUSINESS AND ALSO THE NECESSARY OUTLINE AND DISCIPLINE WHICH SHARPENS PERCEPTIVE FACULTIES, STIMULATES AMBITION, DEVELOPS ABILITY AND PREPARES FOR THE STRUGGLE OF MAKING A LIVING. EVERY STEP IN THE WORK IS CHARACTERIZED BY THOROUGHNESS. BELLEVILLE HAS NO MORE PRACTICAL METHOD.

In teaching shorthand we dictate actual letters and legal evidence. Other schools have undertaken to imitate our methods, but the quality of their work bears testimony to the fact that they are unable to do so.

We represent things exactly as they are.

RECEIVED AT THE POST OFFICE, BELLEVILLE, ON SEPTEMBER 12, 1894, FOR REGISTRATION AS SECOND CLASS MATTER, POSTAGE PAID.

DEVELOPMENT OF CANADIAN BARK.

A western paper, solely devoted to the bark and shipping interests, has obtained reports and sailing lists, and has been given comprehensive tables, and then sums up the situation thus:

"Taking as a basis the eleven States from which we had detailed reports, last year's season in this State is not approached by 17 per cent."

"Again, if we take as a basis the Government estimate of last year's crop, which was given as 69,000,000 bushels for the whole country, we find from the above table that this year's yield cannot be estimated at above 55,000,000, or 17 per cent below the average crop."

"The crop in both Dakota and North Dakota is, in the former State, a total, and in the latter a partial failure. The same holds good in Nebraska. The States of Iowa, Wisconsin, Minnesota, South Dakota, North Dakota and Nebraska, last year had about 55,000,000 bushels of wheat. This year the 5,000,000 raised 18 per cent in the Dakota, must be deducted at least two-thirds, and so more than half of the million bushels Nebraska lost last year; thus from the 11,000,000 bushels of wheat last year, at least 3,000,000 bushels must be taken off, for she shows a preponderance of 16 per cent light yield. While Wisconsin and Minnesota show a good yield, they cannot overcome the above noted deficiency, so the crop in the west cannot exceed 34,000,000 bushels, of which at least twenty per cent will never come to market, but will be fed by the farmers. If we take into account the loss in the States which have not been detailed, we find that the crop per acre of a crop of about 21,000,000, the conditions do not improve, for California, landed 17,000,000 last year, cannot count on more than about 13,000,000. As to New York, which had a crop of 5,000,000 last year, our information shows that the crop is not very satisfactory, either as to yield or quality. The remaining States not mentioned here have at best but little barley; hence they exert but a slight influence on our trade and our market."

"The above would seem to favor the anticipation of a firm market with better prices. A partial revival of the old-time demand for Canadian barley, with the United States barley more favorable to Canadian barley, will be advantageous to our farmers, and especially to those farmers who do not decrease their acreage this year."

"The Ontario Government report says that the average of barley is greater than in 1893. The yield per acre is better than in 1893. The average of barley is greater than in 1893. The yield per acre is better than in 1893. The average of barley is greater than in 1893. The yield per acre is better than in 1893."

THE MARKETS
BELLEVILLE MARKETS
Intermarket Review
Belleville, Sept. 12, 1894

Grain has been very quiet during the week, with light receipts. The barley market has been quiet, and the wheat market has been quiet.

The only article in the family market which has been in demand, is butter, which has been in demand for some time.

When we decided to add the manufacture of carriages, phaetons, etc., to our business, we immediately put under construction a few of each. As we decided to place no vehicle on the market which is not A. 1 in every detail, and knowing that no first-class vehicle can be produced on the road, but made in the workshop, we have succeeded in producing what we call the "St. Charles & Pringle" carriage, which is the best and most complete of its kind.

UNIVERSITY, FRIDAY, P. M.

EDITORIAL REVIEWS

The Norwegian's claim to the discovery of America has been a supporter in Dan Da Chaslin, who has spent years in Denmark, in these days of which, raised by the fact, that he had 1,000 acres and found descriptions of five distinct voyages of the Vikings from Ireland to America. The first voyage is said to have taken place in A.D. 985. M. De Chaslin's book is being sent to a library of the Viking voyage from A.D. 800 to the time of William the Conqueror, A.D. 1066.

It may not be generally known, that a Chinaman condemned to death in his own country, can escape his doom by proxy. This remarkable fact was developed on the other day, when three Chinese deserters were being taken back to China from the United States to be put to death. The men who were condemned to die for the desertion were charged with them, and were well provided with money, and expected to purchase substitutes. Usually a double was for a small pecuniary payment, and time to time to spend the same, will take the place of the condemned man.

A canal of colossal dimensions is projected in Russia. It is intended to connect the river Dnieper and the Black Sea, and to form a waterway from the Baltic to the Black Sea. At present the only route from Odessa to Grunstadt is by way of the Bay of Biscay and the Straits of Gibraltar—and as international transfer prevents the passage of the Dnieper, the Russian Government has been forced at an immense cost to duplicate at Sebastopol the naval arsenal, shipyards and docks, which it already possesses at Odessa. The survey and practical examination of the route is complete, and the work is likely to begin soon.

Mr. Laurier is a success in one way, says the Vancouver Advertiser. He is "the great engineer" in the Canadian political arena. He started out on his present career with a large number of baggage filled with "ifs" and "buts." He scattered a great deal of his impudences through the western part of the Dominion. He will do something about the Manitoba school question "if" the government will do something about it. He would give free trade "if" it is impossible. We can but hope that when he gets back to Quebec he will have exhausted his stock of "ifs" and "buts," put off the garb of "great engineer" with the fund of energy, and the energy which he has collected in this character, be able to do something in Parliament to aid the Government in the work—words on which it is engaged—the building up of Canada and the Dominion. Meanwhile, on behalf of the people of Vancouver, we desire to express the pleasure which the people of Laurier and his friends has given us, and to say that while we agree with the truth of the above compliments paid to Mr. Laurier, that he is a great engineer and enterprising people are those who come well, as they also have the keeness and intelligence to see which political party really is most in accord with their interests, and hence they are in the market, and will go to Ottawa to support the Conservative administration.

The Modern Beauty

Modern men for food and sustenance, with plenty of exercise in the open air. Her form glows with health and her face blooms with beauty. If her complexion needs the clearing action of a "Milkmaid" cream, she uses the genuine and pleasant hygienic type of Pige.

Arthur's Hairer

Who have to visit every other means of relief, should try "Arthur's Hairer." No waiting for results. It is so simple, it is so easy, and so certain, as a simple hair restorer. A BIG, BIG CONTRAST.

THE CHINESE GIANT AND THE PIGMY JAPAN.

The Chinese Nation in the War Many Times Larger Than the Challenger, Her Territory and Population—A Unique History.

There are many things about the war between China and Japan which make it more picturesque than ordinary war. Consider, first, the enormous difference in the size of the combatants. Of course, you know that China is bigger than Japan, and that Japan is bigger than the United States, but you have not heard of the Chinese Empire, which is bigger than the United States, and that Japan is bigger than the United States, and that Japan is bigger than the United States.

The Chinese Empire occupies the entire central portion of Eastern Asia, the big part of the continent, and its area, according to different calculations, from 5,000,000 to 5,500,000 square miles. This includes the territories over which the "Son of Heaven," who sits in his yellow robes in his palace at Peking, has jurisdiction. The Chinese Empire, which is bigger than the United States, and that Japan is bigger than the United States, and that Japan is bigger than the United States.

Exclusive of China proper, the territory of the Chinese Empire includes the great plain of Manchuria or the tremendous plain of Manchuria, which is bigger than the United States, and that Japan is bigger than the United States, and that Japan is bigger than the United States.

Nearly all the population of the Chinese Empire is crowded into China proper, the most fertile and most densely populated place this population at 420,000,000. There are provinces in China which have a thousand inhabitants to the square mile. Belgium, the most thickly inhabited portion of the European world, has only 350 inhabitants to the square mile. Belgium, the most thickly inhabited portion of the European world, has only 350 inhabitants to the square mile.

The Roman Empire at the period of its greatest extent, covered an area of more than 5,000,000 square miles. Neither Augustus nor any of his successors could rule over so vast an empire. The British Empire, with all the islands of India, has a population of 300,000,000. The British Empire, with all the islands of India, has a population of 300,000,000.

Rescue the Perishing.

BROOKLYN, September 16, 1894.—Rev.

Dr. Falmagne, who is still absent on his

journey to the Holy Land, has been the

subject of the sermon through the press

for the last few days. "Holy Compulsion,"

said the text, "is the power of God which

compels the sinner to repentance." "And

compel them to come in."

The preacher pointed out in our day

which the king and queen of our

times never imagined. I walked up and

down the aisle. He said that the

salvation of the world was the work of

the world—and I said, "Can it be

possible that the world is the work of

the world?" "Come, for all things

are now ready, and I urge it upon you

It's Soap, pure Soap, which

contains none of that free

alkali which rots the clothes

and hurts the hands

It's Soap that does away

with boiling or scalding the

clothes on wash day.

It's Soap that's good for

anything. Cleans every-

thing. In a word—'tis Soap, and fulfils its purpose

to perfection.

SURPRISE is stamped

minutes he was out on the ice again. Nothing had happened. Our four English gentlemen from Christiania had to be capital hands in ice work of nothing, glorying in experience strong as young giants. But I in the afternoon the Jarl still completely, and finding no way to go, I stopped the engine in order to save precious coal and took to eating and drinking. In the arctic one can always eat smoke if he has enough meat and fish, and as yet we have a plentiful supply of both. After dinner Captain Borchgrevink thought he saw a new opportunity to catch through and reach the open water. He glided in the sunlight between the ice and Table Island provokingly near.

ceremony they did not know, but knew that if they neglected it, the crop would be poor or wholly lost.

Herodotus offers the quaint explanation that along with those branches there from the desert certain flies possess a "frivolid virtue," which somehow exaggerates fertility to the point of true rationality to the incantation is explained. Palm trees, like human are male and female. The garden the date bearers, were females, the plants were male, and the waving branches over the females meant the ference of the fertilizing pollen from one to the other.

decided to add the manufacture of our business, we immediately purchased a new machine. We have decided to place no vehicle on the market until we are satisfied with it, and knowing that no first-class vehicle is necessary for us to take sufficient business, we have decided to wait until we have succeeded; and when we are nearing completion to offer for sale a new vehicle of our own make. The wood work carefully made, and the upholstery done with the best materials, and the price very low. We recommend these rigs. We will be glad to show you the same.
